Person-Centered Resource Guide

Person-centered planning ensures that individuals accessing health and social services are equal partners in planning, developing, and monitoring their care to make sure it meets their needs. This means putting individuals at the center of decisions and seeing them as experts, working alongside professionals to get the best outcomes.

Person-centered planning considers the individual's:

- Desires
- Values
- Family Situations
- Social Circumstances
- Lifestyles

All of which allows the team to work together to develop appropriate solutions.

Person-Centered **PLAN**

The person leads the process, chooses who is part of that process, and allows them autonomy.

Improved **OUTCOMES**

Enables the person to receive the supports and services that fulfill their desired outcomes.

Informed **DECISIONS**

The person is given the information to direct the process and make informed decisions.

Opportunity **FOCUSED**

Allows the focus to be on opportunities, rather than solely on challenges and problems.
